

EXES Series

FLUSH MOUNTING KIT

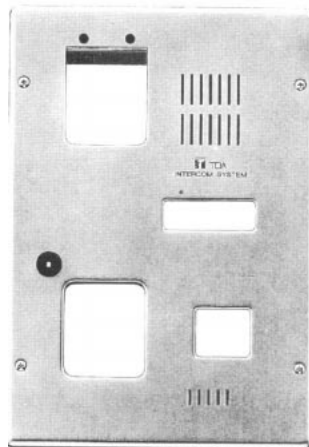

YC-230M, YC-240M FOR MASTER STATION

YC-230S, YC-240S FOR SUBSTATION

YC-231, YC-241 BACK BOX

YC-230M

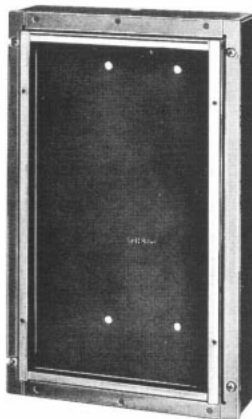

YC-230S

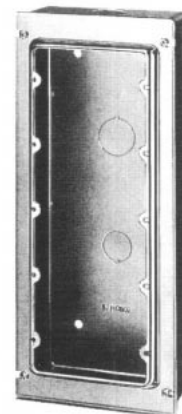

YC-240M

YC-240S

YC-231

YC-241

Features

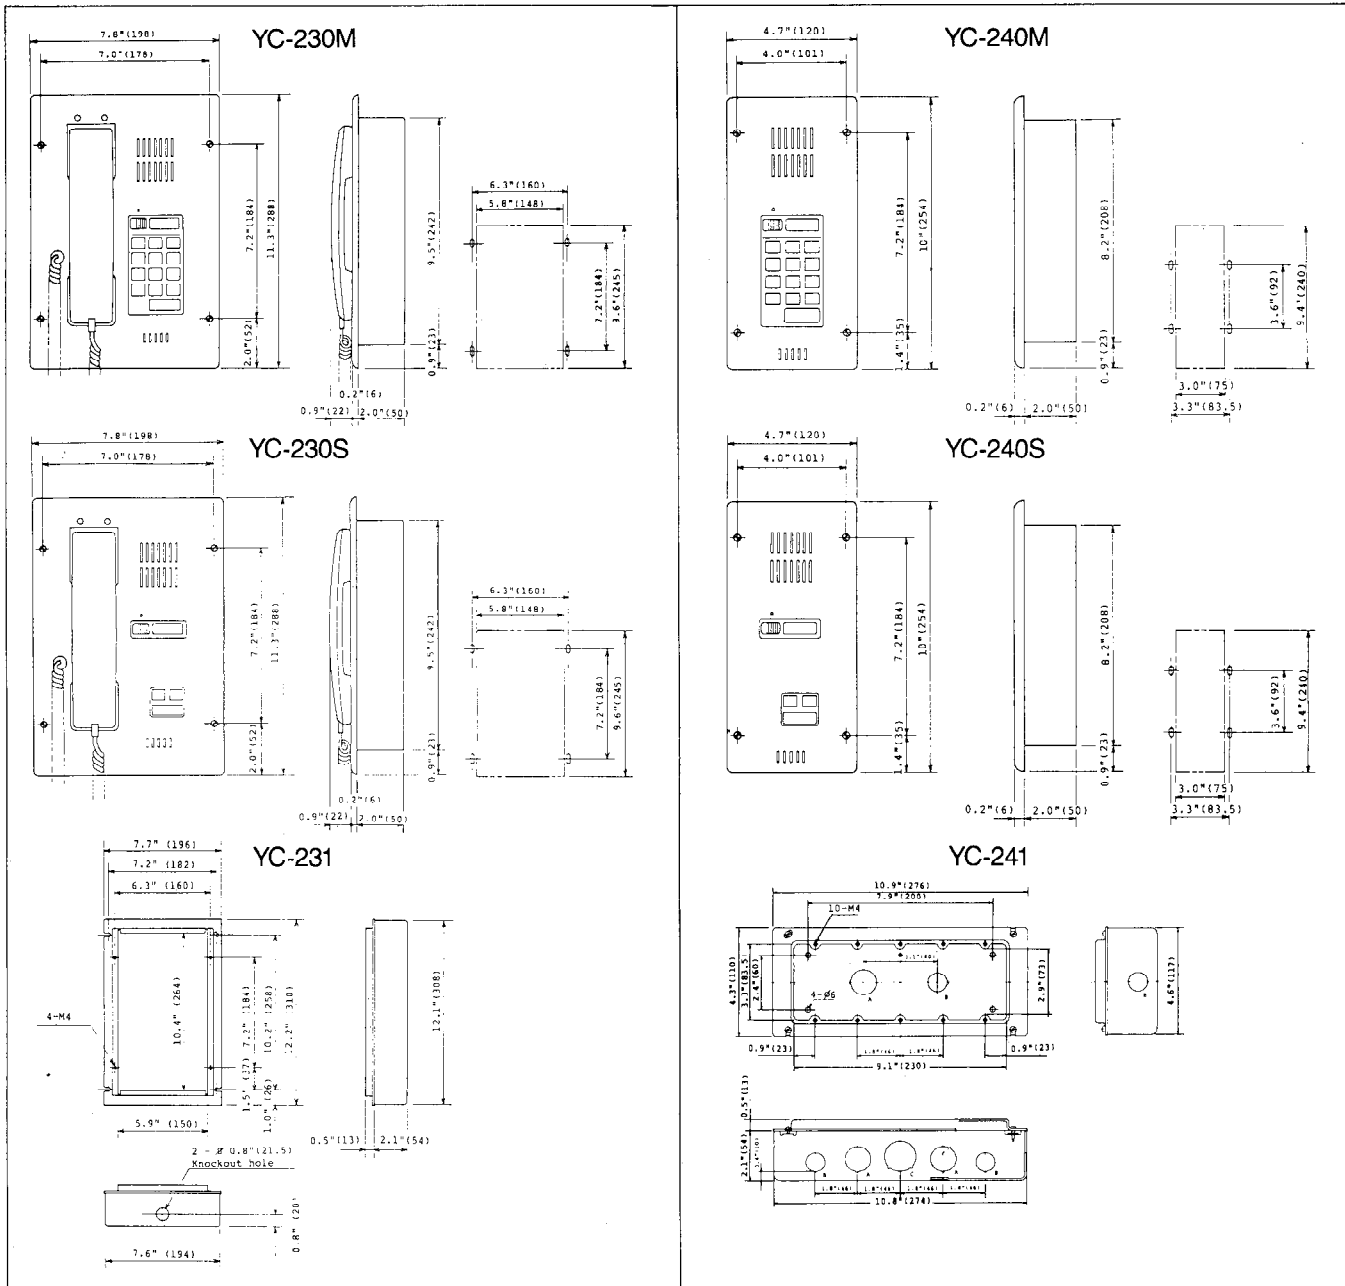

1. Panels allow unobtrusive flush-to-the wall mounting.
2. Separate panels for master or substation use.
3. Hairline stainless steel finish on panel.
4. Acoustic absorber for use with matching back box.

Descriptions

1. The YC230M is used with the YC-231 back box to mount the HF-200M or HF-200MB in the wall as a flush-mounted master station.
2. The YC-230S is used with the YC-231 back box to mount the HF-200M or HF-200MB in the wall as a flush-mounted substation.
3. The YC240M is used with the YC-241 back box to mount the HF-210M or HF-210MB in the wall as a flush-mounted master station.
4. The YC-240S is used with the YC-241 back box to mount the HF-210M or HF-210MB in the wall as a flush-mounted substation.
5. The YC-231 back box is used with the YC230M or YC-230S flush-mounting kit.
6. The YC-241 back box is used with the YC240M or YC-240S flush-mounting kit.
