Products Used

- AM-CF1 Integrated Audio Collaboration System

Purpose

The office was in need a improving their meeting room sound quality for both the room itself and the participants in other venues. Sound clarity was key.

Challenges

The only challenge was find the right Audio Collaboration System that provide intelligible sound and delivered the coverage necessary in the meeting room.

Solution

TOA Canada recommended the AM-CF1 Integrated Audio Collaboration System which provided the room coverage and intelligibility they required. The AM-CF1 also delivered on the quality audio on the other end during conference call.

Feedback

Members of the 3P team really appreciated the upgrade in sound but also found the portability of the system as a great advantage when and if they need to move the conference system to another office or building.
