

## Annexair, Drummondville, QC

Founded in 1998, Annexair is a private North American company located in Québec, Canada. The company focuses on the designing and manufacturing of high-quality, energy-efficient air handling systems.

## Products Used

- PE-304
- SC-630TU
- F-2352SC
- FB-120
- DA-250
- DA-500

## Purpose

While reassessing their current audio systems, Annexair had decided that they were long due for an upgrade. Their aim was to improve their background music and multi-zone paging system.

## Challenges

Being a large, noisy facility, it was important to overcome that to ensure all employees can hear announcements. It was also crucial to provide high-quality audio for background music and paging that met the company's budget and the owner's high expectations.

## Solution

TOA strategically positioned a combination of our sleek PE-304 Pendant speakers and low-profile F-2352SC wide-dispersion ceiling speakers throughout the facility to create an even, crystal-clear sound. This sound was balanced by the bass produced by TOA's FB-120 Subwoofers which were also strategically installed. Addressing concerns regarding effective communication to employees while working on the noisy manufacturing floor, TOA had installed powerful SC-630TU Paging Horns. This audio setup is powered and controlled by a combination of TOA's DA-250 and DA-500 multi-channel amplifiers.

## Feedback

The owner was highly impressed that TOA not only managed to meet his budget, but had also exceeded his expectations. The new audio system produces rich, beautiful background music and clear, intelligible communications.

## About TOA Canada Corporation

TOA Corporation was founded in Kobe, Japan over 80 years ago. TOA operates in over 100 countries worldwide, with manufacturing Facilities found in nearly every major market area. These facilities have a reputation for precision design and fabrication, resulting in a Proven track record of TOA product reliability.
