Products Used

- M-9000M2 - Series Pre-Amplifier
- DA-250FH Multichannel Power Amplifier
- DA-500F-HL Multichannel Power Amplifier
- SC-630TU Paging Horn Speaker
- TC-651M Reflex Horn Speaker
- SP-11N SIP Module

Purpose

The facility is large and management wanted an improved paging system for the entire facility for better communication, emergency alerts and staff safety.

Challenges

After the initial assessment, it was obvious that the main challenge was the extremely high decibel output from the machinery. Developing a system to overcome that became the utmost importance.

Solution

TOA's designed team collaborated with the facility management and provided details on how best to conquer the loudness of the machines. We recommended the SC-630TU, TC-651M horns with proper EQ delivering intelligible announcements. The M-9000M2 for mixing and sound distribution, DA-500 for performance and power. The SP-11N module was utilized for connection to the phone system and zone paging.

Feedback

After installation and plenty of testing TOA equipment delivered on the quality and high performance we market. The customer was very happy with the results and felt the staff was now safer.
