

### De La Salle College , Toronto, ON

The campus, located in the heart of Toronto, caters to grade 5-12 students. The facility includes the main building with classrooms, administration, auditorium, gymnasium and chapel. The complex also has an outdoor area with all purposes field, and tennis courts.

### Products Used

- CS-761W 2-Way Coaxial Horn Speaker
- CS-304 Wide Range Weatherproof Speaker
- P-924MK2 Power Amplifier

### Purpose

The school did not have an audio system outside to deliver public address to their students or provide emergency announcements and tones when required.

## Challenges

They searched for a system that provided powerful and intelligible audio and at the same time strong enough to operate in the harsh weather of Canadian winters. They also want the speakers to be installed on the school's steeple.

## Solution

TOA recommended one of our newer products, the CS761, 2-way horn speakers that were water resistance, IP66, and could handle cold weather. With the proper mounting brackets, the integrator easily installed the CS-671's on the required location. Close to the ground around the building, water resistant, 30W CS-304 were used for their robust make up and powerful audio distribution. The speakers were powered the TOA's 240 W, P-924MK2.

## Feedback

The sound disseminating from the new speakers were very loud and were easily heard and understood around the building. The student body appreciated the need for clear communication.

## About TOA Canada Corporation

TOA Corporation was founded in Kobe, Japan over 80 years ago. TOA operates in over 100 countries worldwide, with manufacturing Facilities found in nearly every major market area.
