

Hamilton Port Authority, Hamilton, ON

Ranking among the top 10 ports in Canada, averaging volumes in excess of 12 million metric tons per year.

Products Used

- N-8000: IP intercom system
- N-8640 DS: IP door substation

Purpose

Hamilton Port Authority (HPA) wanted to implement a security system at all 12 of their piers. They needed to control access to the Hamilton Port Piers to provide safety and security to all of their visitors.

Challenge

To integrate TOA's IP intercom system with other branded equipment and ensure they work seamlessly together.

Solution

TOA's IP Intercom (N-8000 Series) was installed to permit communication between visitors to the pier and security center. At each pier there are manned gates for vehicular and pedestrian traffic. Each gate has an IP door substation (N-85400DS) allowing the visitor to communicate with the main security office at the Hamilton Port Authority.

Feedback

The Hamilton Port Authority was a very successful installation and the results were very satisfactory.

About TOA Canada Corporation

TOA Corporation was founded in Kobe, Japan over 80 years ago. TOA operates in over 100 countries worldwide, with manufacturing facilities found in nearly every major market area.
