

HomeSense Erin Mills, Mississauga, ON

Founded in 2001, HomeSense is a Canadian retail chain dedicated to discount home furnishings.

Products Used

- BG-2120
- F-2352C
- Q-HY-BC1W

Purpose

HomeSense required an audio setup capable of producing high-quality, intelligible audio for their paging and background music needs.

Challenges

Due to the nature of being a large open space with high ceilings, the audio setup needed to produce a clear, evenly dispersed sound while keeping the amount of reverberation minimal. It was also important that the audio speakers were low profile in order to maintain a visually appealing environment.

Solution

TOA Canada designed a layout that strategically suspended our F-2352C Wide-Dispersion Ceiling Speakers throughout the store to produce even, intelligible sound with minimal reverberation. The Wide-Dispersion Speakers were housed and suspended in TOA's White Back Cans allowing them to blend in more with their surroundings. The setup is easily controlled and powered by TOA's BG-2120 Mixer Amplifier.

Feedback

The team at HomeSense Erin Mills is thrilled with the effectiveness and reliability of their newly installed audio system. The installed equipment blends in seamlessly and outperforms expectations.
