

La Loche Community School Dene Building, La Loche, SK

La Loche Community School's Dene Campus is one of two campuses offering grades seven to twelve within the village of La Loche in northern Saskatchewan, Canada.

Products Used

- DA-250FH Multichannel Power Amplifier
- M-864D Digital Stereo Mixer

Purpose

The head end of the school's current audio system is aged and requires to be upgraded with a system to bolster their sound system's potential. La Loche's Dene Building's audio system consisted of multiple output zones such as: classrooms, halls/common areas, outdoor areas, and tenants (daycare and NL college).

Challenges

Prior to the installation of a new system, the school's aged IC-100 system must be removed. Additionally, the many rooms and common areas that audio had to be delivered to all varied in size and contour. Therefore, a system must be devised that meets each area's unique requirements with maximum clarity and minimal reverberation.

Solution

After taking into consideration the school's requirements, TOA had replaced their old system with a combination of both the M-864D Digital Stereo Mixer and the DA-250FH Multichannel Power Amplifier. This combination supplied a generous amount of input and output channels, an increased ease of accessibility, and an outstanding level of clarity throughout the entire campus. Furthermore, TOA had two analogue microphones installed in two of the school's offices as a backup to their VoIP system.

Feedback

Once again, TOA Canada had delivered an excellent public address solution. The school's faculty and students can appreciate the improved sound clarity, making all communications much more effective.

About TOA Canada Corporation

TOA Corporation was founded in Kobe, Japan over 80 years ago. TOA operates in over 100 countries worldwide, with manufacturing Facilities found in nearly every major market area. These facilities have a reputation for precision design and fabrication, resulting in a Proven track record of TOA product reliability.
