

Marina Boat Tour Saint John, NB

The Saint John Marina offers narrated sightseeing cruises on the Saint John and Kennebecasis rivers aboard a Mississippi-style river boat. The river boat is climate controlled and features two enclosed levels with lots of seating and a fully licensed bar. In addition to their regularly scheduled public cruises available June through November.

Products Used

- BG-2480D-AM Mixer Amplifier
- F-1300BT Wide-dispersion Speaker System
- MW-41BT Audio Interface

Purpose

The owner of the boat required a solid audio system to reinforce the sound and improve the intelligibility when the tour guide is talking through the mic and music is playing.

Challenges

The tour boat was not very big, so the system that was installed needed to be a reasonable size to fit in a certain cupboard and they wanted an easy to use interface for control.

Solution

TOA recommended the reliable BG series amplifier for their performance and compact size. F-1300 speakers were spread throughout the boat to cover every area and the elegant MW-41BT audio interface was installed for easy control.

Feedback

After installation and testing the owner was very happy with the performance of the system.
