

Mobilio Condo, Vaughan, ON

The condo developer created these 21 storey buildings that housed 550 total units. It was located in Vaughan just north of Toronto, and close to many amenities.

Products Used

- N-8600MS IP Master Station
- N-8000RS Sub Station Interface Unit
- RS-170 Substation

Purpose

TOA was asked to provide ideas for an intercom system for the Parking level and ground floor of the 3 towers, to permit reliable communication.

Challenges

As a new construction the builders wanted a system that provided effective and intelligible communication but most of all it needed to be reliable. They also required that the system be easy to install as there were a short window to install and also easy to use for the staff and residents of the condo.

Solution

TOA recommended the versatile and robust N-8000 IP intercom series. The building ordered a large quantity of RS -170 substation, a few N-8000RS interface sub station and a few N-8600MS IP master stations. Working with the installer, TOA was able to ensure a quick install and training on the operation of the intercom.

Feedback

Condo management were very satisfied with the performance of the intercom system and told TOA that they made the right choice by selecting TOA products.
