

Polish Hall, Edmonton, AB

Event facility for various gathering such as weddings, birthdays and corporate events. The entire space features pillarless design for unobstructed viewing and wireless capabilities and maximum flexibility in sound.

Products Used

- F-122C Wide-Dispersion Ceiling Speaker
- DA-250FH Multichannel Power Amplifier
- A-9120SM2 9000M2 Series Amplifier

Purpose

The key objectives were, clear sound at various volumes with the ballroom, audio throughout all areas of the building and the capability to perform paging.

Challenges

The project was a typical ballroom/event space setup. Sound needed to be loud but not over the top where it become unintelligible. They also required multi zone paging for different areas of the hall.

Solution

To accomplish system control and paging ability, TOA 9000 series matrix mixer was chosen as the head end. The wide dispersion F-122C ceiling speakers were used for sound and powered by a DA-250 amplifier.

Feedback

The customer was incredibly happy with the sound system. It performed very well, and his only regret was that he didn't upgrade his system with TOA products earlier.
