Products Used

- TS-820 Infrared Conference System

Purpose

This Six Nations of the Grand River post-secondary organization required a new conference system for their conference room for enhanced communication.

Challenges

The system needed to be portable, be infrared and work with the Crestron video conference system. The conference units also needed to be easy to use and not too cumbersome to move around.

Solution

TOA knew that our TS-820 Infrared conference system would work well in their facility, be compatible with Crestron and could be moved when necessary. The question was what we can recommended to move the system. TOA worked with the integrator, Hamilton Video and Sound to create a cart on wheels with appropriate cabinets that permitted the easy transportation of the units to other section of the school when required.

Feedback

The innovative trolley worked like a charm for that aspect. After a few meetings the school observed the quality sound that emanated from the conference system, and they were very happy.
