

Sherpa Group, Quebec

For 20 years, Sherpa Technology Group has aimed to be a top supplier of AV solutions. As a distributor of top quality AV equipment, they understand that to achieve their goals, the solutions provided must go beyond the supply of hardware.

Products Used

- A-9120DH
- AM-1
- F-2352C

Purpose

After assessing their boardroom, Sherpa had decided to install a boardroom sound reinforcement system to boost the effectiveness of communications.

Challenges

It was important that the newly installed system featured hands-free operation. The system also needed to produce a clear, intelligible sound that best suits the space.

Solution

TOA Canada's AM1 Real-Time Steering Array Microphone was the perfect solution. The microphone setup detects and tracks sound sources to capture voices clearly without the need of handheld operation. Our F-2352C Wide-Dispersion Ceilings Speakers were also installed throughout the boardroom to produce intelligible, high-quality audio. The system was powered by the multi-channelled A-9120DH Amplifier.

Feedback

The equipment was shipped and installed with ease and was met with positive feedback. The setup has greatly improved the sound quality and overall effectiveness of their board meetings.

About TOA Canada Corporation
