

## Centre de Santé et de Services Sociaux de Manicouagan, Baie-Comeau, QC

Centre de Santé et de Services Sociaux de Manicouagan is a hospital located in Baie-Comeau, Quebec.

## Products Used

- N-8033MS: Flush Mount Master Station
- N-8000EX: IP Network Intercom Exchange

## Purpose

The surgery block at Centre de Santé et de Services Sociaux de Manicouagan required a hands free and footswitch operated communications system. Working in a cleanroom and hands free environment, it's important for the doctors and nurses to have products that fit the specifications.

## Challenge

TOA needed to find equipment that can connect the surgery block to the rest of the hospital and also resist the use of chemical products.

## Solution

TOA recommended components from their IP Intercom Product line, including their Flush Mount Master Stations (N-8033MS). These master stations are manufactured just for hospitals. They are IP-65 rated, chemical resistant for use in industrial and harsh environments and offer an input for use with foot switch dialing.

## Feedback

The surgery block at the hospital is delighted with their communications system, especially that they can communicate with other areas within the hospital through a reliable hands free operation.

## About TOA Canada Corporation

TOA Corporation was founded in Kobe, Japan over 80 years ago. TOA operates in over 100 countries worldwide, with manufacturing facilities found in nearly every major market area.
