Purpose

TOA needed to work with the building team and consultant to design a general paging and speaker monitoring system throughout the building, including in the multi-functional community room.

Challenge

TOA had to work with various groups to ensure that the designed TOA system was properly installed.

Solution

The VM-2240 System Management Amplifier in combination with the 9120DHM2 amplifier and reliable speakers made the entire system work extremely well. It provided a much needed and reliable means of communication throughout the entire facility.

Feedback

Both consultant and user are extremely satisfied. The system is easy to use and produces strong and intelligible audio.
