- EV-700: Digital Announcer

Purpose

The purpose was to upgrade the aging audio system while at the same time improving the sound quality, hotel coverage flexibility of the overall system.

Challenge

To complement and blend into the ambiance and the splendor of this hotel, The Background Music and Paging system had to be pleasing to both the eyes and the ears.

Solution

This project was a challenging one for our team and the install team working with us. The size of the hotel and the architectural design caused our team to create a design and take into account all the nooks of this fabulous facility. With one of the key wants of the customer being a system that blends well into the hotel while being pleasing to the ears and eyes of guest. TOA recommended our line of Interior Design Speakers, which provide a pleasant look and quality sound. Along with our powerful mixers and amplifiers, which all were integrated perfectly by the install team, the end result was a working, flexible system and sound great throughout the facility.

Feedback

The Customer was very excited about the new sound system and how easy it was to adjust. Paging and background music could now be triggered quickly. Another satisfied customer!
