Products Used

- F-122C: Wide-Dispersion Ceiling Speaker
- CS-64: Wide-range Paging Speakers
- DA-250 or DA-500: Multi-channel Amplifiers
- M-9000: Matrix Mixer

Purpose

The Forzani Group chose TOA Canada equipment when deciding to modernize the sound and paging systems in a few of their stores across Canada.

Challenge

Although many of the stores were similar in size, each facility had its own unique needs and structural oddities, which forced our technical team to ensure that each store had its own audio design so that the sound and paging clarity was established.

Solution

The combinations of Ceiling speakers and wide range paging speakers along with the powerful DA series of amplifiers complimented by the M-9000matix mixer properly placed in each store provided the sound dispersion and clear sound the Forzani group was looking for.

Feedback

Our customer was very happy, not only with the performance of the equipment at each location, but with the service provided by the TOA team and our ability to visually show them how the system would perform illustrated by the audio design presented to them before the project was started.
