- SC-304 Paging Horns
- 9000 Series Modular Digital Matrix Mixer/Amplifier
- ZM-9014 Remote Control Panel
- ZM-9001 Remote Panel
- 5000 Series UHF Wireless Microphones

## Purpose

The Westfield Golf and Country Club wanted to update their audio system. The Golf Course wanted to provide background music (BGM) and paging throughout the clubhouse and on the greens. Life Safety is important to the owners and management of Westfield Golf and Country Club. They wanted to be able to communicate with their members and patrons, especially in the event of an emergency, such as lightening.

## Challenge

The golf course wanted to provide the best communication inside and outside the facility, so that patrons could clearly hear announcements and instructions. This would require different variables to be taken into consideration.

## Solution

To blend into the appearance of the clubhouse, TOA's Pendant public address speakers were chosen. These sleek speakers not only look great, but also sound great and are ideal for this type of application. SC Series paging horns are weather-resistant and audible and are installed throughout the outside areas of the facility. Westfield Golf and Country Club now feels confident that they not only have an aesthetically pleasing audio and paging system, but an effective way to communicate with their patrons and staff both inside the main buildings and around the grounds of the golf course.

## Feedback

The customer was very satisfied with the performance and look of the installed TOA equipment.

## About TOA Canada Corporation

TOA Corporation was founded in Kobe, Japan over 80 years ago. TOA operates in over 100 countries worldwide, with manufacturing facilities found in nearly every major market area.
