

## Xerox Research Centre, Mississauga, ON

Xerox is Canada's leading materials research centre and home to a world-class team of scientists and engineers with broad expertise in materials chemistry, formulation design, prototyping, testing, and chemical process engineering.

## Products Used

- A-9240SHM2 Amplifier
- Q-RM9012 Remote Microphone
- Q-SS9012 Speaker Selector
- EV-20R Sound Repeater

## Purpose

Management wanted to enhance the paging system of the research centre to include the ability for zone paging and message repeating. The old system was old and had operational issues.

## Challenges

The building was very large and included many sections. The integrator needed to ensure the paging solution would carry sound throughout the building and that the programming on the amp and repeater was set up properly.

## Solution

After removing the old system and ensuring the TOA solution easily connected to the speakers, the A-9240 amplifier and EV-20R sound repeater were programmed to the specification of management's need. Everything worked well.

## Feedback

Xerox was very satisfied with the new paging system that eliminated previous problems and now offered more options.

## About TOA Canada Corporation

TOA Corporation was founded in Kobe, Japan over 80 years ago. TOA operates in over 100 countries worldwide, with manufacturing Facilities found in nearly every major market area. These facilities have a reputation for precision design and fabrication, resulting in a Proven track record of TOA product reliability.

TOA Canada Corporation was formed in 1990 as a complete sound solutions provider, specializing in commercial audio, including, Public address, voice communications, voice evacuation and emergency paging requirements. TOA Canada offers complete solutions for all corporate and commercial audio communications and intercom security requirements.
