

## Yellowknife Airport , NWT

Yellowknife Airport is located in Yellowknife, Northwest Territories, Canada. The airport is part of the National Airports System, and is operated by the Government of the Northwest Territories. The airport has regular scheduled passenger service and a number of freight services. The Airport handles approximately 675,000 passengers a year.

## Products Used

- F-122C Wide-Dispersion Ceiling Speaker

## Purpose

The airport needed an upgrade on the public address system that communicated messages throughout the entire facility. Management was not satisfied with the clarity of the current speakers and needed a reliable brand.

## Challenges

The challenge for the airport was to find speakers that delivered intelligible announcements in the terminal to ensure the every person had the ability to understand the message. The other main point was to find a reliable and intelligible speaker that was cost-effective.

## Solution

With the reliability of TOA speakers in mind, the F-122C ceiling a speaker covers an extremely wide area and can be used for 25, 70 and 100 V line applications. It was selected for the well-balanced sound that can be heard uniformly at any location.

## Feedback

The enhancement to clearer announcements was obvious and management was very happy with the results.
