## N-SP80 SIP Intercom System

**A smart product that's easy to set up.  
The N-SP80 opens up the world of access control.**

## Overview

### N-SP80 SIP Intercom Station

**Talk, See and Control via Network**

The N-SP80 Series SIP Intercom Station employs the Session Initiation Protocol to enable both audio and video communication. Compatible with the G.722 audio codec, the N-SP80 supports high-quality audio and video transmission. The device features easy unlocking operation that gives you simple access to controls. This makes it ideal for installing at a building entrance, carpark gate, or other point of entry. And with TOA you're assured of thorough after-sales service - we're a specialist manufacturer of security and audio equipment serving customers in over 120 countries worldwide.

The N-SP80 series SIP Video Intercom System offers flexible audio and video communications using standard SIP and Onvif protocols. It can integrate with external SIP compatible systems through a SIP server. Peer-to-Peer mode is also available for standalone system operations without SIP server environment. TOA's N-8000SG SIP gateway software is also available to integrate with TOA's N-8000 IP intercom system.

## Product Features

### N-SP80VS1 SIP Video Door Station

- Robust and weatherproof hardware
- Built-in AEC (acoustic echo canceller) enables intelligible full-duplex communication
- Less cabling thanks to PoE
- 3MP camera resolution
- Photosensitive sensor detects brightness and turns on infrared light to capture pictures in darkness
- Flexible LED color and behavior setting
- ONVIF compatible
- Anti-vandal function via external control input

### N-SP80AS1 SIP Audio Door Station

- Robust and weatherproof hardware
- Built-in AEC (acoustic echo canceller) enables intelligible full-duplex communication
- Less cabling thanks to PoE
- Flexible LED color and behavior setting
- Anti-vandal function via external control input

### N-SP80MS1 SIP Multimedia Station

- Intuitive operation with 7-inch touch screen and dial keys
- Less cabling thanks to PoE
- Address book stores up to 3000 names
- Forwarding setting (always/call/no answer)
- DND (do not disturb) – ignore incoming calls
- Auto Redial – redial an unsuccessful call a set number of times within a designated interval

### System Features

- Supports G.711a, G.711μ, G.722, G.729 audio codec's for high-quality conversation
- Unlimited number of stations are connectable in one system using peer-to-peer mode
- System configuration and setting via web browser
- Secondary SIP server for server redundancy
- Detects server disconnection
- Flexible ringtone setting

Clearly see and hear the person at the door.

TOA's N-SP80 SIP Intercom System offers flexible audio and video communications using standard SIP and Onvif protocols. It is compatible with a variety of SIP servers. The N-SP80 can work as a stand-alone system or it can be integrated with TOA's N-8000 IP Intercom system via the N-8000SG SIP Gateway to audible communications as well as door access control.

## Key Benefits

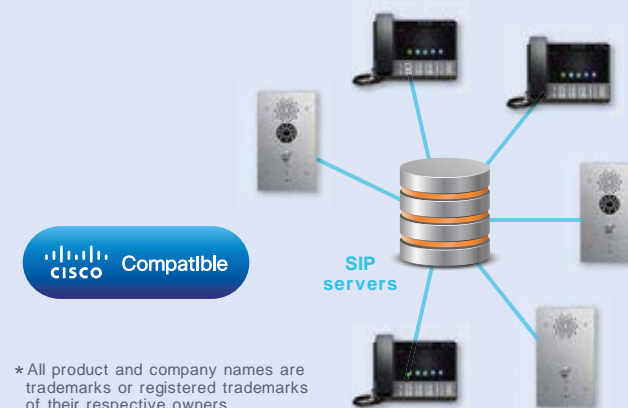

### Supports peer-to-peer communication

Build a system with stations only—no need for an SIP server.

### Compatible with variety of SIP servers

Where an SIP server is already in place, adding an N-SP80 station is easy. It's compatible with Cisco CUCM, Asterisk and Genetec Sipelia.\*

\* All product and company names are trademarks or registered trademarks of their respective owners.

## Key Benefits

Doors unlockable from master station keypad

Can be part of a scalable system

The N-SP80VS1 SIP Video Door Station complies with ONVIF Profile S, so it can be integrated with third-party systems.

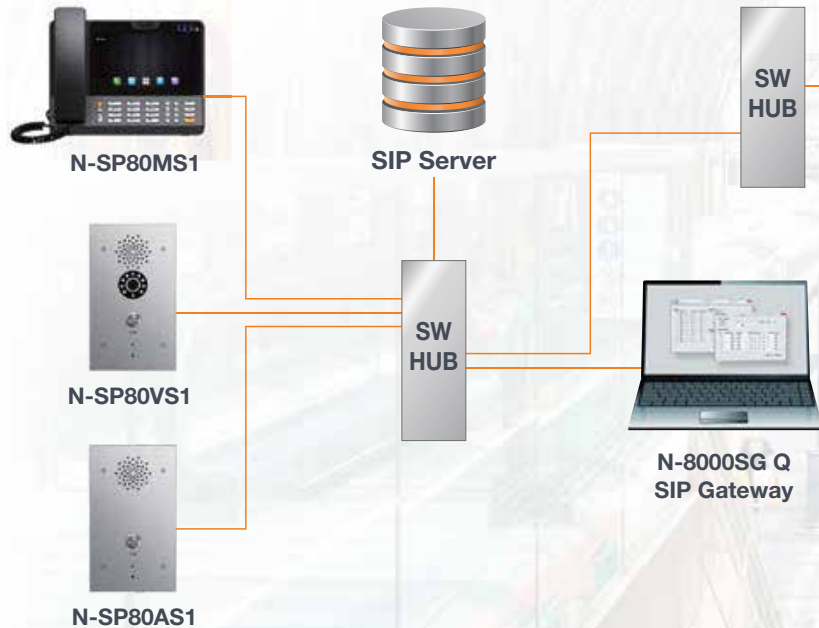

# Conservation & Door Remote Control...

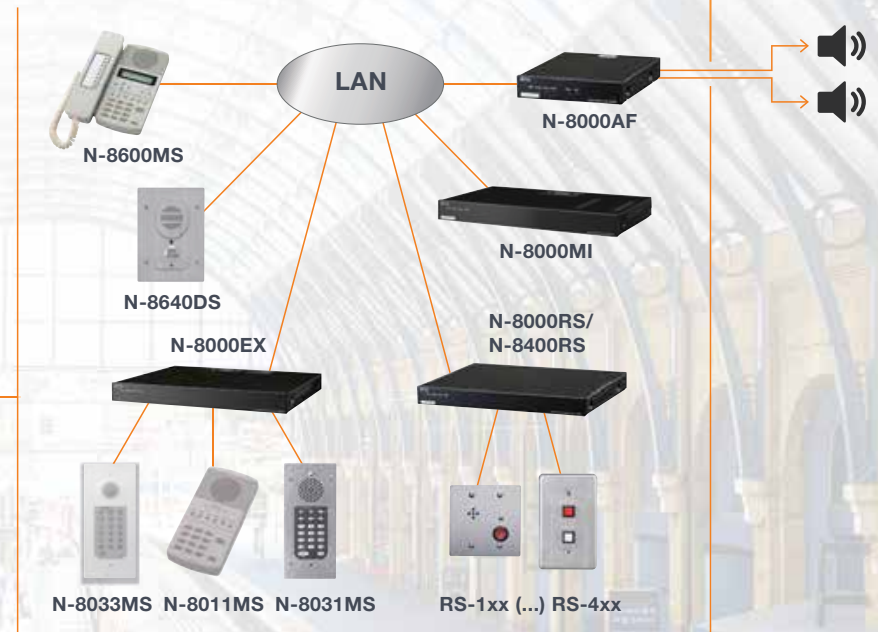

... can be done easily with the latest Video Intercom System.

# System Examples

The N-SP80MS1 can be used in tandem with TOA's N-8000 to deliver public announcements and support access control. Adding the optional N-8000SG allows you to add a video access control function to an existing N-8000 Series intercom.

## N-8000 IP Intercom System

# System Examples

## Commercial Building

Standard Security Application, such as Building entrance, Parking. The N-SP80MS SIP Multimedia Station can communicate with the N-SP80VS1 Video Door Station or N-SP80VS1 Audio Door Station. 'Door remote control' function can be directly operated from SIP Multimedia Station to the door stations. The N-SP80 Series are compatible with a variety of SIP servers, e.g. the Genetec Security Center that the Genetec Security Center can communicate and have door open with the N-SP80 Series Door Station. The SIP multimedia station can also integrate with the N-8000 system with paging function, door remote control and conversation function.

## Retrofit Installation

## Schools

Paging can be from SIP Multimedia Station in administration room to the classroom with the integration of N-8000 system as well as PA system. Conversation and door open can be done from N-SP80 SIP Multimedia Station in administration room to the entrance.

## N-8000 IP Intercom System

A versatile, highly reliable IP Intercom system designed to meet user needs for flexible, cost-effective configuration and operation.

# Features & Functions

## System Features

- System configuration by LAN with intuitive software
- Master-to-Master and Master-to-Sub station communication
- Choice of four wiring configurations: CAT5, 2-core shielded cables, 2 wires or 4 wires
- Integration with access control, voice alarm, CCTV and other such systems
- Time correction
- Operation and stream logs
- System diagnosis

## Overview

TOA's unique N-8000 IP Intercom System is an integrated audio communication system that employs packet audio technology over the IP network to achieve fast, accurate communications with optimal security and reliability. Applications range from conversation, paging broadcasting and BGM broadcasting to emergency paging and broadcasting, audio triggering and other security functions.

## System scalability

The cost-effective N-8000 System can be configured to a scale that meets users' specific requirements, however small or large. As few as two stations can be linked in a small system, or up to 192 components can be interconnected to operate as many as 3,072 stations.

## Borderless communications

Since the N-8000 System is IP network-compatible, it supports linkage between local areas and other locations worldwide. Centralized PC control with dedicated TOA software enables connection of all exchanges, IP stations and interface units with LAN, WAN and optical fiber networks.

## Integrated communications and safety features

Efficient centralized control integrates various systems to handle communications ranging from duplex conversations between stations to paging broadcasts, scheduled broadcasts and BGM broadcasting. The N-8000 System also provides master control for connection to users' per-existing intercom, alarm, surveillance, door entry/departure authorization and other systems as well as to telephone lines.

## Basic Communication Features

- Handset or hands-free conversation
- Recall
- Redial
- Camp on busy
- Mic-Off
- Remote response
- Single-digit dialing
- Call transfer
- Comprehensive call-forwarding features
- Three-party conferencing

## Easy installation and maintenance

The surprisingly easy system installation requires a minimum of on-site work, since existing wiring can be used and new components simply plugged in. The dedicated TOA software includes a maintenance application for system status monitoring, troubleshooting and logging as well as for system updating and remote control.

## Long-term cost-effectiveness

Since N-8000 software and all calls between stations are free of charge, users enjoy the benefit of significantly lower telephone bills. Overall ownership costs are also reduced by the open-ended system architecture and network scalability permitting individualized configuration.

## Superior sound quality

The N-8000 system provides high-quality audio for BGM, paging and recording applications.

## Full logging options

The complete menu of operation and stream logging options includes operation verification, voice communications and line supervision logs, all of which can be archived easily for instant recall.

## Internal and external system security

The N-8000 System is equipped with both a round-the-clock internal surveillance function to minimize downtime and a proprietary packet audio protocol to prevent wiretapping.

# System Specifications

## LAN Connections

Max. 192 units (total no. of Exchanges, Interface Units and IP stations)

## Station Connections

Max. 3,072 stations (16 stations connected to each of 192 Exchanges)

## Voice Links

Max. 768 links (4 links for each of 192 connected N-8000EX Exchanges)

## Paging Zones

Max. 192 zones

## Paging Outputs

Max. 384 outputs (2 outputs for each of 192 connected N-8000 Exchanges or Multi-Interface units)

## BGM

Max. 8 channels (number of channels selectable from a station)

## PBX Interface

Max. 384 units (2 units for each of 192 connected Multi-Interface units)

## Tie-Line Interface

Max. 384 units (2 units for each of 192 connected Multi-Interface units)

## Outside-Line Interface

Max. 192 units

## Telephone Interface

Max. 192 units (when 192 Telephone Interface units are connected)

## External Contact Output

## Permits the creation of a wide variety of system configurations through the free combination of individual interface units

- PBX Connection
- Tie-line connection
- External equipment control
- Remote door control
- External input broadcast
- Paging interlock contact output control
- Call station indicator
- Remote dialing
- Contact bridge
- Office line connection
- BGM
- Paging
- Conversation recording
- CCTV interlock
- Direct select
- System diagnosis
- Time correction
- Time signal

## N-8000MI

Max. 3,072 (16 outputs for each of 192 connected Multi-Interface units)

## N-8000DI

Max. 6,144 (32 outputs for each of 192 connected Direct Select units)

## N-8000AF

Max. 1,536 (8 outputs for each of 192 connected Audio Interface units)

## External Contact Input

### N-8000MI

Max. 3,072 (16 inputs for each of 192 connected Multi-Interface units)

Max. 6,144 (32 inputs for each of 192 connected Direct Select units)

### N-8000AF

Max. 1,536 (8 inputs for each of 192 connected Audio Interface units)

## [Network Relations]

### Audio Delay Time

80 ms/320 ms; changeable

### Connection Delay Time

Max. 1 second (when 191 multicast paging destinations are set)

### Bandwidth Used

Max. 2.08 Mbps (one-way)/unicast paging to 16 locations  
Max. 130 Kbps (two-way)/per call

## A variety of convenient functions

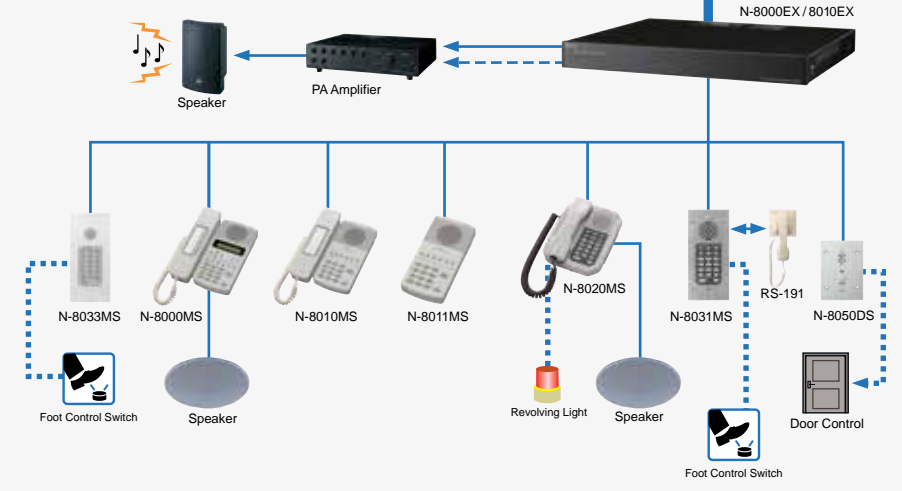

- Voice calling
- Automatic connection
- One-touch dialing
- Automatic call forwarding
- Emergency call interruption
- Emergency all-group paging
- Emergency message broadcasts
- Three-party conference
- Emergency paging
- Hands-free conversation
- Continuous call
- Call hold
- Busy call
- Paging call
- Paging response
- Scan monitor
- Door remote
- Audio trigger

**School Time Signal Function** Enables the built-in chime of the N-8000AF or an externally connected audio source to be broadcast to stations and PA equipment according to a preset schedule. The time signal function allows schools to manage the schedule of their bells (end and start) for class changes, breaks. The N-8000AF also allows control of an external/optional digital recorder, such as TOA's EV-20R, to play pre-recorded (into EV-20R) special tones or selected melody, on schedule.

A large system with up to 2048 zones is realized on the IP Network.

From a remote location, IP Station\* can make a paging call to any selected zone(s).

\*N-8610RM and N-8600MS.

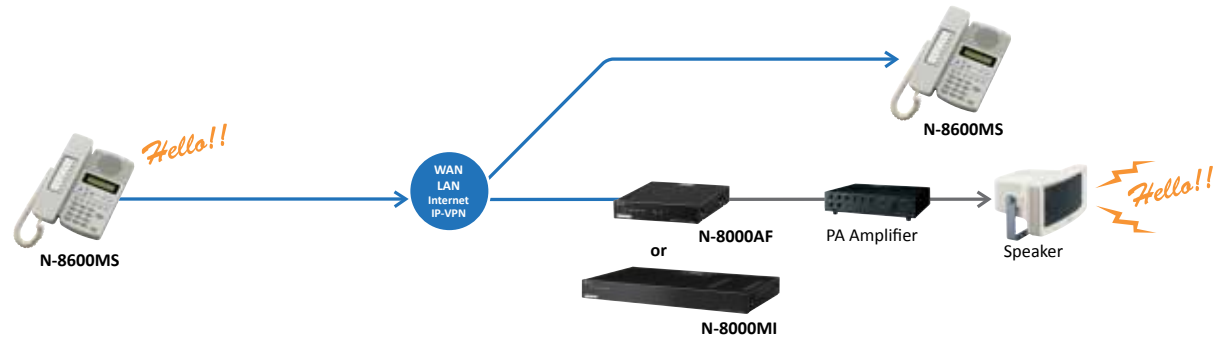

Max  
2048  
zones

# Key Functions

**Paging Function** Allows the master station as well as external input equipment to initiate paging by PA equipment or the speakers of individual stations. Operators can use the setup software to configure up to 192 paging zones to which paging calls can be made as desired.

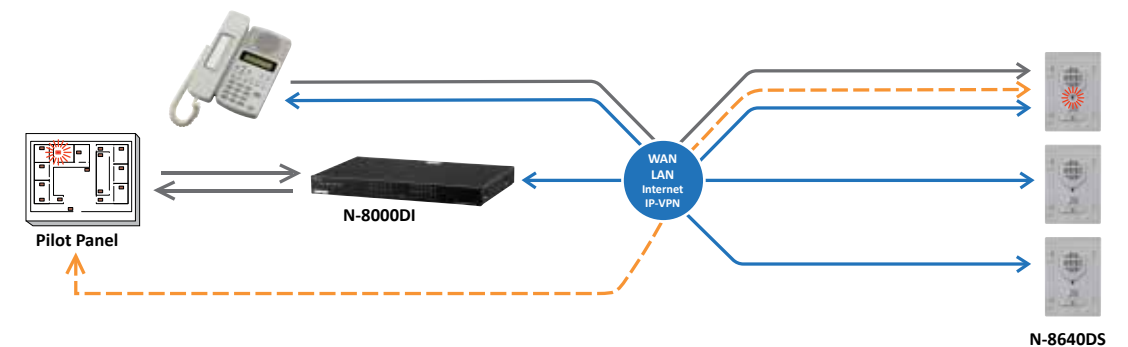

**Remote Control of External System** Makes it possible to execute door lock control easily through a contact output when the master station is engaged in ongoing conversation with the N-8640DS or N-8050DS Door Station.

**Privacy Mode** Activated by a control on the RS-140 Switch Panel, blocks paging calls to connected speakers and prevents scan monitoring except for emergency calls.

**Direct Select** Configures an operation panel equipped with indicator lamps and control buttons for the master station. Compatible with other stations, the panel assigns the various contact input and output channels to the master station and substations for purposes of identifying which substation is calling the programmed master station.

# Key Functions

**Scan Monitor** Enables remote security monitoring by allowing the master station as well as analog telephones and external telephones to audio monitor two or more pre-programmed stations.

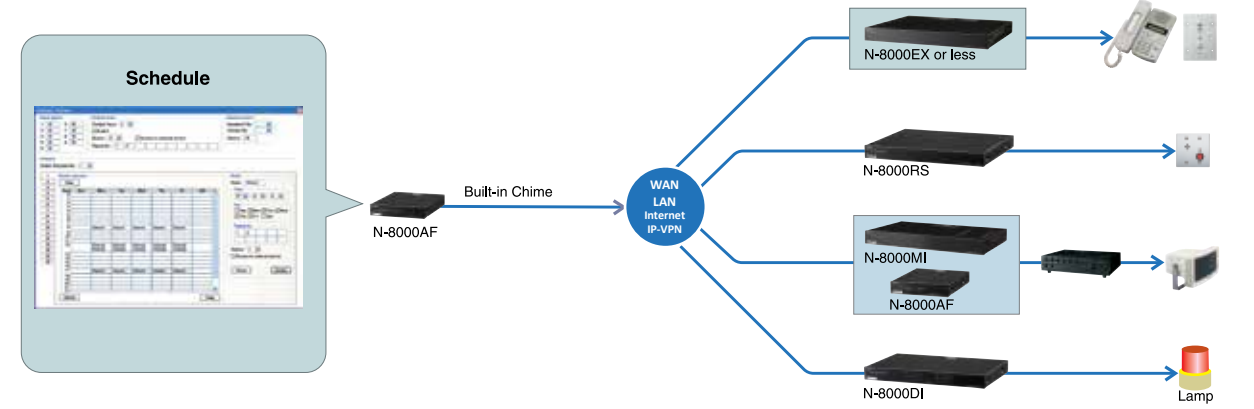

**BGM Broadcasting** Enables music from any of eight BGM sources connected to the N-8000MI to be distributed through speakers at the master and door stations.

**Audio Trigger** Sets off an alarm if audio input to a pre-programmed station's microphone fulfils pre-set conditions (detection time or signal level). Examples include calls to the designated master station or contact output generated by another interface unit.

**Time Signal Function** Enables the built-in chime of the N-8000AF or an externally connected audio source to be broadcast to stations and PA equipment according to a preset schedule.

# Key Functions

**Emergency All-Group Paging** A function that suspends ongoing conversations, paging and other operations to allow emergency all-group paging to all stations, PA equipment and lines.

**Message Paging** Initiates emergency paging with prerecorded emergency messages on the IP Master Stations.

**Emergency Call** Pushing the call button twice quickly commands the door station and substation to make an emergency call to master stations and analog telephones.

**Recording** Any conversation between master station/telephones and during a three-party conference, paging messages, and scan monitored audio can be recorded on recording equipment connected to the N-8000AF.

# System Software

## Setting Software

The network settings and the detection of the equipment connected to the local network can be set. The paging system settings, advanced settings of functions for each individual equipment, and settings for the whole system can also be adjusted.

### [Minimum System Requirements]

OS: Windows® XP Professional SP2 or later/  
Vista Business/7 Professional  
CPU: Pentium® 4 2 GHz or faster  
Memory: 1 GB or more  
Required component: Microsoft® .NET Framework 3.5 SP1 or later, and Microsoft® SQL Server 2005 Express Edition

## Recording Software

Telephone calls, paging, and 3-Party Conference on the N-8000 system and recording of the voice during the Scan Monitor can be managed as a wav format. After selecting the recording subjected equipment, recording related settings can be adjusted. It is possible to easily search the recorded audio files and also to export the audio files to an external storage.

### [Minimum System Requirements]

OS: Windows® 7 Professional SP1 (32/64bit)  
Screen resolution: Over 1024 × 768 pixels  
Required component: Microsoft® .NET Framework 4

### [Recommended Specifications]

CPU: Intel® Core® i5-2400 CPU @3.10GHz or faster  
Memory: 4 GB or more  
Free Hard Disk Space: 100GB or more  
(About 2.7 GB is used per sound source at 24-hour continuous recording)

## Maintenance Software

This software displays the equipment name, station number, station name, etc. of individual equipment components within the system in the form of an at-a-glance list. System check function is used to confirm equipment firmware versions, update firmware, check connections between a PC and equipment components and between components, download various equipment log and setting files, and perform equipment clock settings. Although the above functions can be done on the browser, use of the N-8000 Maintenance Software permits such functions to be performed simultaneously for multiple components. Moreover, it displays the operation status of individual components in real time. Equipment operation logs can also be automatically saved to a designated file on the PC.

### [Minimum System Requirements]

OS: Windows® XP SP2 or later  
Required component: Microsoft® .NET Framework 3.5 SP1 or later  
Screen resolution: Over 800 x 600 pixels

### [Recommended Specifications]

OS: Windows® Vista Business/7 Professional  
CPU: Pentium® 4, 2 GHz or faster  
Memory: 2 GB or more  
Screen resolution: Over 1024 x 768 pixels

## SDK

TOA Canada is now offering software developers a software development tool for the N-8000 Intercom in the form of an SDK. With the SDK, a software developer will be able to create and/or interface the N-8000 platform into existing or newly developed software. Also supplied with the SDK will be an SDK application example, SDK user manual and the N-8000 protocol.

Please contact TOA Canada to obtain the SDK and support files.

# System Software

## Software Application to Control N-8000AF Scheduler

TOA Canada employs a software application to control the N-8000AF Audio Interface Unit. This software gives access to the schedule and bell configuration portion of the existing N-8000 scheduling software. With this software multiple users can be granted access to make changes to the schedule.

## SIP Gateway

The N-8000SG Q SIP Gateway allows you to connect the N-8000 intercom system to a SIP phone system.

Communication can be established from the N-8000 to the SIP phone system and vice versa. This also allows up to 5 conversations at one time with the ability to initiate a page and access the door remote control features.

### Interconnection between N-8000 system and SIP system

- Call and transfer from N-8000 to SIP, and vice versa

### Digital domain connection

- Audio conversion from N-8000 to SIP and vice versa
- N-8000 uses G.722, fs=16kHz/8kHz, 16bit; SIP uses G.711 u-law

### 5 speech paths at the same time

- 5 conversations with SIP and N-8000 at the same time
- 5 paging zones from SIP telephone at the same time
- e.g., 2 conversations and 3 paging zones in total at the same time

### Additional functions from SIP system

- Paging function from SIP telephone to N-8000 system
- "Door remote control" from SIP telephone to N-8050DS, N-8640/50DS

### [Minimum System Requirements]

OS: Windows® 7 Professional (32/64bit)

License: "USB Dongle" required

## IP Base Station

### »» N-8640DS: IP Door Station Q-N8640DS: IP Door Station Weather-resistant

- Chemical resistant for use in industrial/harsh environments.
- 4 contact outputs / one input for use with access control systems and remote dialers.
- External speaker connection 0.5W @ 8 ohms.
- Allows Full-duplex conversation with master stations.
- Q-N8640DS has a rubber boot covering the call button

### »» N-8650DS: IP Indoor Station

- Indoor use IP door station employing packet audio technology
- Connected to an IP network (LAN or WAN) permits hands-free conversation
- Equipped with 1 channel of control input, 5 channels of control outputs (including 1 channel of relay control output), and 1 speaker output

### »» N-8640SB: IP Door Station Board Unit

- Chemical resistant for use in industrial/harsh environments.
- 4 contact outputs / one input for use with access control systems and remote dialers.
- External speaker connection 0.5W @ 8 ohms.
- Allows Full-duplex conversation with master stations.

## Interface Units

### » N-8000AL: Telephone Interface Unit

- 10/100BaseTX Ethernet network connection
- Occupies one network node (192 max.)
- Single telephone line allowing an analog telephone to be connected.
- Allows any analog telephone to function as a master station.

### » N-8000CO: C/O Interface Unit

- 10/100BaseTX Ethernet network connection
- Occupies one network node (191 max - at least one node must be a master station or N-8000/8010EX exchange)
- Analog central office line circuit allowing the stations to make and receive calls to and from the telephone line.

### » SX-200IP: IP Interface Module

- 10BASE-T/100BASE-TX (Automatic-Negotiation)
- Voice sampling frequency of 16 kHz, 8 kHz (controllable on the software); 48 kHz, sample rate is used for SX-2000 system only
- Voice encoding method - Sub-band ADPCM, Cryptosystem
- Voice Packet Loss Recovery - Silence insertion
- Allows for a page to be made from the N-8000 Series Stations (N-8600MS, N-8610RM only) to the SX-2000 Series.

## 2-Core Shielded Cable Type

### »» RS-144: IP Intercom Switch Panel

- May be programmed for dual-priority call or call into two different master stations.
- Connects to N-8000RS & N-8010RS exchanges via shielded twisted pair wire and 25V speaker for half-duplex communication with assigned master station.
- Optional RS-141 handset may also be used.

### »» RS-143: IP Intercom Switch Panel

- Connects to N-8000RS & N-8010RS exchanges via shielded twisted pair wire and 25V speaker for half-duplex communication with assigned master station.
- Optional RS-141 handset may also be used.

### »» RS-140: Switch Panel

- Call button and privacy button with LED Indicators.
- Supports two-way (half-duplex) communication.
- Prevents incoming calls, pages & scans by pushing the privacy switch.
- Private, handset conversation is available using the RS-141.
- Connects to N-8000RS/8010RS using twisted two-core, shielded cable.

### »» RS-142: IP Intercom Switch Board

- Allows configuration with custom housing and switch.
- May be programmed for dual-priority call or call into two different master stations.
- Connects to N-8000RS & N-8010RS exchanges via shielded twisted pair wire and 25V speaker for half-duplex communication with assigned master station.
- Optional RS-141 handset may also be used two-core, shielded cable.

### »» N-8400RS: Sub-station Interface Unit

- 10/100BaseTX Ethernet network connection
- Occupies one network node (191 max - at least one node must be a master station or N-8000/8010EX exchange)
- Up to 16 substations connectable using 2 sets of twisted pair cables
- Speech links: Internal 1, External 2

Model	N-8400RS	
Power Source	120V AC, 50/60Hz	
Power Consumption	35 W (at rated), 45 W (Max.)	
INTERFACE SECTION FOR SUB-STATION	Number of Lines	16 lines
	Number of Speech Links	Internal 1, External 2
	Transmission Range	1000 m (1093.61 yd)/ø0.5 mm (AWG24), 1500 m (1640.42 yd)/ ø0.65 mm (AWG21), 2000 m (2187.23 yd) ø0.9 mm (AWG19)
	Wiring Method	2 sets of twisted pair cables
NETWORK SECTION	Network I/F	10BASE-T/100BASE-TX (Automatic-Negotiation)
	Network Protocol	TCP/IP, UDP, ARP, ICMP, TFTP, RTP, IGMP
	Audio Packet Transmission System	Unicast, Multicast
	Voice Packet Loss Recovery	Silence insertion
	Audio Delay Time	80 ms, 320 ms (controllable by the software)

# Dealer Certified Training

We believe that success comes through education. That's why we have developed out N-8000 IP and N-SP80 SIP Intercom, Dealer Certified Training Program.

The two day program is an intensive in-class course that leads you through the technical Parameters of TOA's two intercom systems.

- Selection • Design • Program, and Install.
