

Installation made easier than ever thanks to infrared system coupled with clear sound amplification. Wireless conference system provides flexible adaptation to diverse styles of conference.

INFRARED WIRELESS CONFERENCE SYSTEM

TS-820 / 920 Series

Professional, Practical, Pyramid-inspired
Upgrade your boardroom to executive mode

Minimal Contour

With its pyramid-shaped outline, the rear view is minimized to reduce the impact of visual noise on the desk.

Natural appearance,
as if protruding from the desk.

Dignified Solid Shape

The solid design creates a formal and impressive atmosphere for conferences.

Excellent Telexistence

A full spread surface that creates a direct dialogue with the speaker.

High Conference Quality

The shape of the unit for a conference hall is straightforward in its design; the rear view suppresses an obscured view. The voice is as if the speaker was facing you. The unit's design relieves the impression of "talking through equipment" and fosters a more direct feeling of speech.

High Audio Quality

Carefully designed audio processing and hardware for enhanced audio performance

Stress-free Conference

Advanced feedback suppressor minimizes acoustic feedback.

Uniform Sound Volume

Auto Gain Control function provides uniform sound volume by adjusting the gain based on how loud or soft the person's voice is.

Supporting smoother management of small to medium-scale conferences

Wireless Units for System Flexibility

Wireless feature makes the system ideal for any conference apt to change the number of participants or layout.

Selectable Microphones

Long or short microphones can be used depending on requirements.

Key Functions

4 2-language conference capability
*TS-920 Series only

1 Selectable number of open microphones

2 Three of microphone operating modes

3 Mic auto-off function automatically turns off the mic after 30-second silence

5 3-choice voting function for quick voting and vote counting
*TS-920 Series only

TS-920RC

Built-in audio recording

Conference can be recorded in mp3 format on a widely available USB memory or internal memory.

*When TS-920RC is used.

*Software image is for illustration purpose only

External Control

Available remote control protocol enables conference operation on custom-made software as well as integration with other devices such as cameras.
