Integration Box

---

The integration box shall permit the Assimilation with third party systems for automatic alerting, such as fire and lockdown systems. The integrator box shall bridge communication between the TOAlert communication platform and other building alarm systems. The integrator shall contain two general-purpose inputs that connect to contact closure switches. The integrator shall support physical wiring to monitor normally open (dry contact) security system switches providing maximum reliability and fast response for automatically triggered alerts. The maximum quantity of integrator boxes in one system is 5. It shall have a wired Ethernet connectivity of 10/100M, RJ45 connector. The device will have an output function that allows secondary devices, such as strobes and audio alarms, to be controlled. The device comes with a 2-year warranty. The integrator, when sold with TOAlert system, will be covered under the 5-year license for the operation within the communication platform. Input voltage to power supply: 100-240VAC, 50/60Hz Power supply output voltage: 12Vdc. The dimension of the display device shall be 5.6" L x 3.6" W x 1" H x (142.2 L x 91.4 W x 25.4 H mm). Weight shall be lbs. 2.3 lbs.

The Integration Box shall be TOA model EAIV3
